

The Premier Quality Workflow Solution

RISLinQ™ is a flexible and easy-to-use web-enabled radiology practice management solution that can be tailored to the size and needs of any imaging environment.

With features that help increase patient throughput and workflow productivity, RISLinQ helps the most complex business environments improve efficiency, simplify processes, increase profitability and optimize reimbursement.

RISLinQ provides a safe and effective business solution with a limited investment in time and resources. Access to RISLinQ simply requires a computer, a web browser and an internet connection. You will be up and running quickly, your costs will be predictable and you will have no expensive, on-site servers to buy.

1 Front Office Efficiency

RISLinQ's user-friendly front-office functionality allows personnel to schedule complex imaging procedures quickly and accurately. This efficient package simplifies the process with:

- Automated or manual scheduling for single and multiple locations
- Embedded CPT and ICD-9 codes
- Installed facility specific requirements, including study preparations and customized alerts

2 Simple Integration from Referral to Read

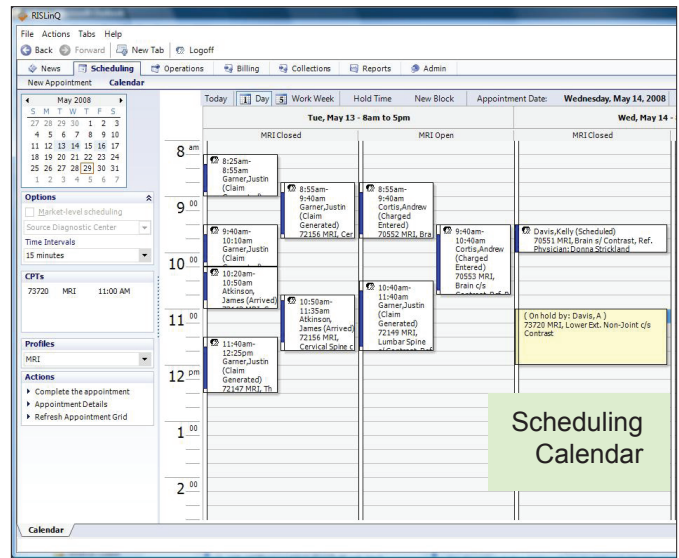

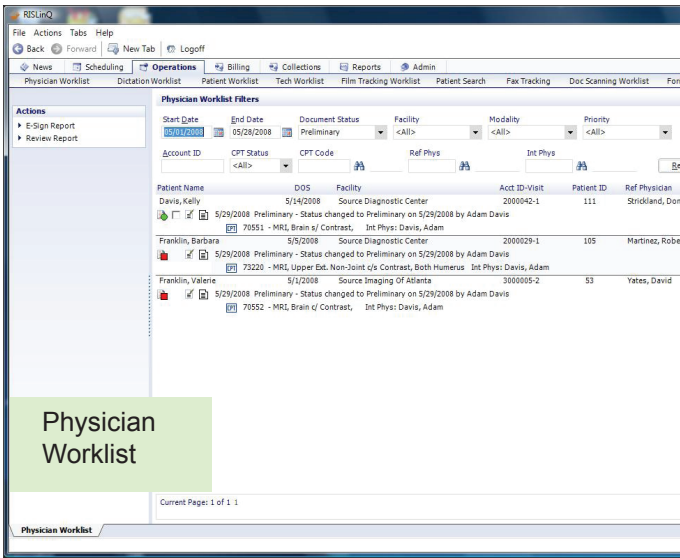

RISLinQ helps ease the workload of the referring and reading physicians. Whether they work directly in your department or in a remote location, RISLinQ offers them:

- Systemized workflow suggestions
- Customized reports
- Onsite or offsite reading physician transcribing and report signing
- Automatic transfer of medical reports into the referring physician's EMR

3 Compatible with your Enterprise Architecture

Each RISLinQ module is compatible with your IT enterprise, whether you're replacing your entire RIS, or just improving pieces.

- HL-7 interface with any HIT system and any other RIS component
- No server to purchase
- Web-enabled for easy access within or outside of the imaging center
- System updates at scheduled times when your patient traffic is low

4 Intuitive Billing/Collections Workflow

RISLinQ's billing and collection modules ensure timely patient statement and insurance claim submissions. The streamlined workflow solution helps ensure you receive appropriate reimbursement and helps improve cash flow with:

- Insurance eligibility checks
- Electronic claims submission and management
- Patient statements
- Enterprise-wide payment posting
- Centralized billing

Financial Impact

RISLinQ can help you achieve:

Workflow Efficiency

Operational Standards

System Optimization
