NCCN Includes FDG PET in New Guidelines for Evaluation of Early-Stage Lung Cancer Patients  
March 10, 2008 docguide.com

## LITERATURE REVIEW |

Staging Pathways in Recurrent Colorectal Carcinoma: Is Contrast-Enhanced 18F-FDG PET/CT the Diagnostic Tool of Choice?  
Journal of Nuclear Medicine. 2008 Mar;49(3):354-361.

*(18)F-FDG PET/CT has gained wide acceptance for evaluation of recurrent colorectal carcinoma. However in clinical practice, contrast-enhanced CT (ceCT) is still the first-line restaging tool. [Read More . . .](#)*
